WooCommerce and Sage Plugin

Through our fenyaEDI solution we provide a seamless plugin between WooCommerce and Sage, whereby we automatically sync:

- **Customer Orders.**
  - o   Orders are directly imported into your ERP.

- **Product Information.**
  - o   Which includes information such as pricing, specials and general product details.

- **Product Stock on Hand.**
  - o   Multi-warehousing compatible.

This EDI solution connects your ERP to your WooCommerce based store and removes the gap between your ecommerce site and accounting software. Further to this, we provide a customised web portal whereby one can maintain oversight of

We have added Xero and Quick-Books to our WooCommerce EDI integration platform.
